

ABSENTEE LABEL FILES NOW ENCRYPTED

The absentee label files are now encrypted in a self extracting file. This has been done to make the content of the file unavailable to Internet search engines. We are doing this in response to voters who expressed concerns about the information being available in clear text on the web. By encrypting the files, internet search systems should not be able to read and index the files.

Once you save the file to your system. Double click the file, or open the file with your zip/unzip software (WinZip, PKZip etc). When you are prompted to enter the password enter `v o t e` with no spaces and in all lower case.
